# About Us

## 20+ Years of Experience

Denver Railings and Metal Art is a local, family-owned and operated custom metal fabrication company located east of Denver International Airport in Strasburg, Colorado. We have the creative problem-solving abilities and years of experience to tackle most projects ranging from small residential decks and patios to large-scale commercial or industrial steel projects. Our in-house fabrication team is talented and diverse, allowing Denver Railings to control every stage of a project, delivering products that meet our highest standard of quality. Our team works hard to ensure every client is completely satisfied from first encounter to delivery.

**1200+  
CLIENTS  
SERVED**

## **What services do we provide?**

At Denver Railings and Metal Art, we specialize in a diverse array of custom steel fabrications ranging from residential staircases to commercial railings and industrial skids and catwalks. Some of the products and services we offer include:

- Mono and dual stringer staircases.
- Spiral and sweeping staircases.
- Quarter, half and 3/4 turn staircases.
- Railing: steel, glass and cable.
- Fencing and driveway gates.
- Pergolas and awnings.
- Privacy screens and steel decking.
- Storm doors & security bars
- Window well covers.
- Fire features and pits.
- Catwalks, platforms and skids.
- Welded plates and brackets.
- Container modifications and structural frames.
- Laser cutting: brackets, signage, artwork, etc.
- Powder coating: furniture, bumpers, more.

# *A diverse* **Portfolio...**

We serve homeowners and contractors, delivering beautiful and well-built designs that meet every budget. Whether you're looking for an economical solution or a specific aesthetic for your custom home, we can make it happen for you.

*...that meets every client's needs.*

# Spiral Staircases

A spiral staircase is both a space-saving marvel and an artistic statement piece that elevates your space from ordinary to “wow.”

Our spirals are available in standard code-compliant diameters (60", 72" & 84") and feature both vertical and horizontal railing styles with either round or molded cap handrail profiles.

Upgrade your spiral with your choice of balusters, laser art inlays or tread designs. Add anti-skid and lights for safety or a tread wrap for a touch of elegance.

*Elevate your space!*

# Sweepers and more.

Every project requires specific solutions. Whether a client has a particular design in mind or their space has unique challenges, we can design, fabricate and install a solution that works.

We build mono- and dual-stringer straight, quarter- and half-turn staircases as well as custom radius sweepers and large diameter spirals.

For the extra-tight space or access to attics, storage and maintenance areas, we design and build custom ship ladders, alternating tread ladders or roll-and-stow library ladders as the situation calls for.

# Railing Solutions

Custom railings offer style, safety and minimal maintenance with competitive market pricing. Combined with expertise, quality craftsmanship and a full-service experience, this gives every client confidence in Denver Railings & Metal Art to deliver on its promise of customer satisfaction.

Choose from our standard style catalog or build your own design. We offer all-steel, steel with cable or glass or custom solutions for your wood, composite or other material integrations.

All of our railing systems are finished with attractive and durable powder coatings that withstand the wear-and-tear of daily use.

*A touch of class!*

# Gates

Enhance your property's style and security with simple function or statement elegance with a driveway, walkway or security gate.

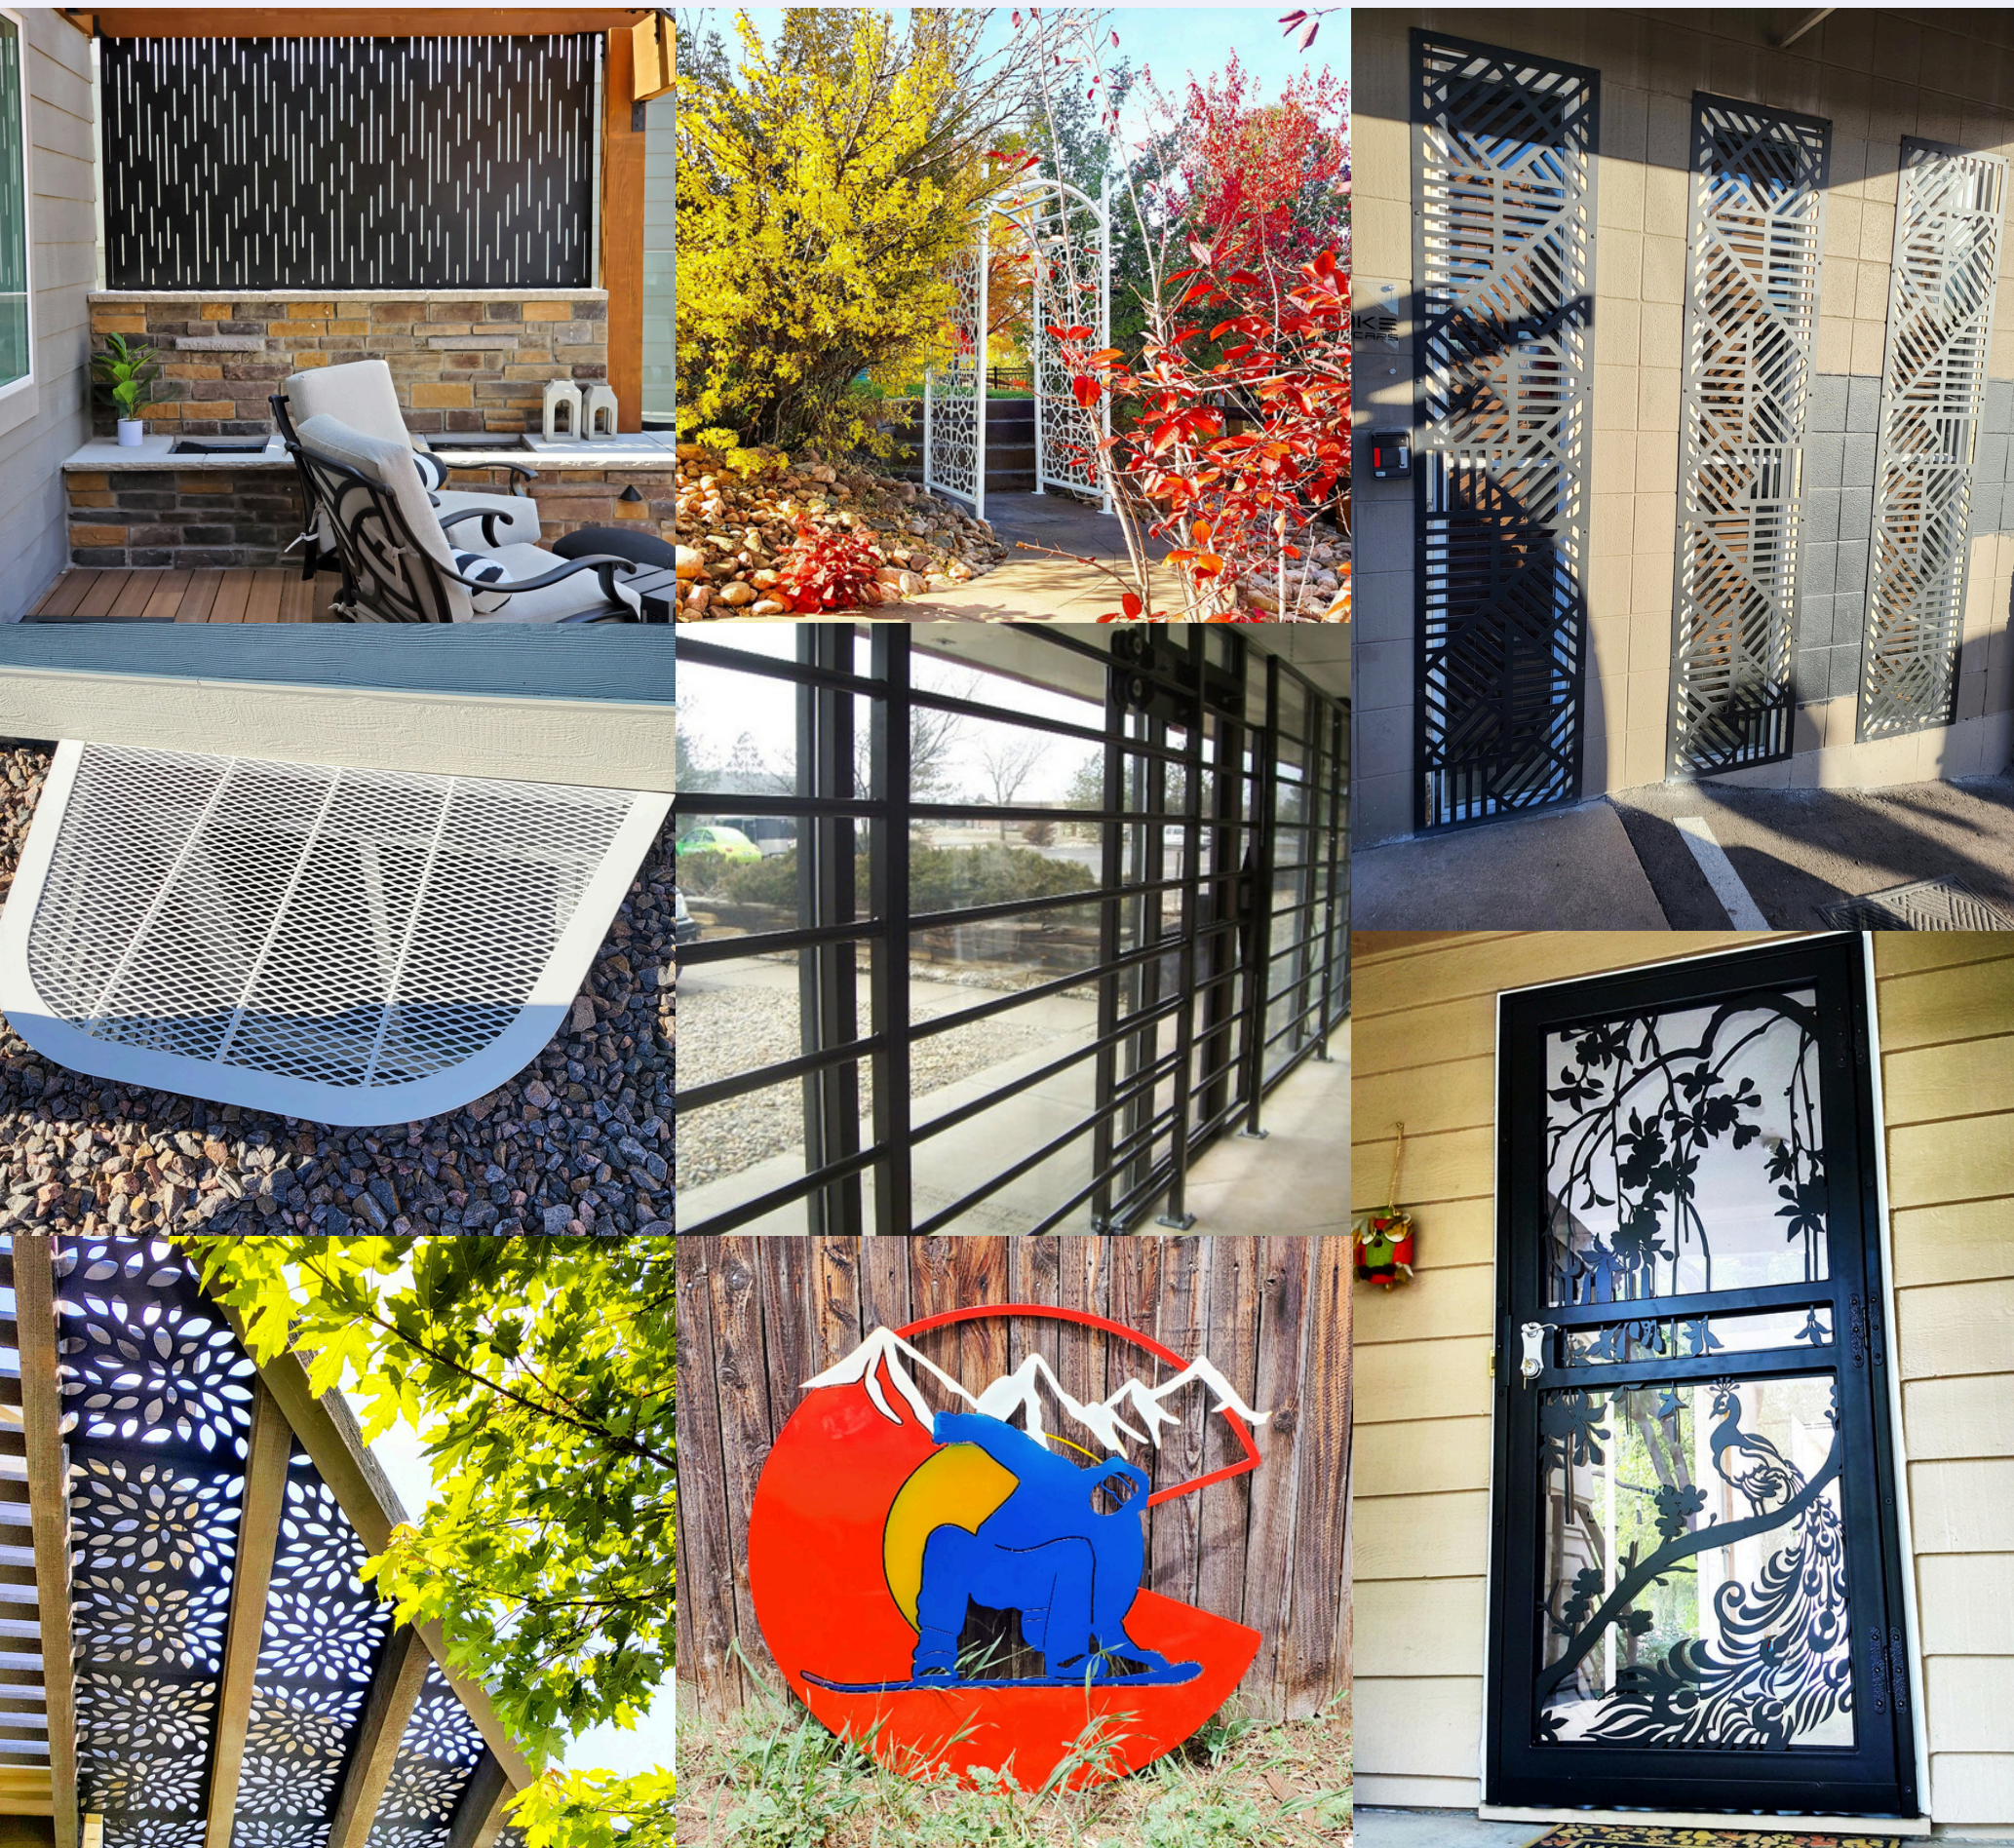

Gates can be installed to add security and beauty to your home or business entrance, to provide toddler or pet safety or restrict wild animal or vehicle traffic. Paired with a railing or fencing system, your property's security can be seamless. Driveway gates can be equipped with electronic controls with options for solar.

Denver Railings and Metal Art will work with each client to achieve a solution that meets their unique needs and budgetary considerations.

*Beauty & security!*

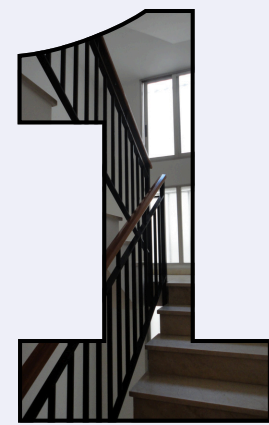

# Privacy, Metal Art & more

From custom CNC laser cut privacy screens, storm doors and window security to arbors and artwork, Denver Railings & Metal Art's team has the design sensibility and ability to fabricate products that can add both function and beauty to your home, landscape, business and more.

*Stylish design & function!*

# Our Process

## Design

Work with a sales coordinator to make your design selections.

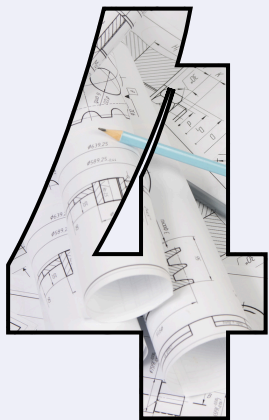

## Sign & Deposit

Sign your contract and pay a 50% deposit.

## Measure

A representative will visit the project site and take detailed measurements.

## Shop Drawing Approval

Our CAD department will generate detailed shop drawings which you will review and approve.

## Fabrication

Once drawings are approved by you, your project will advance to production where it will be fabricated and finished.

## Installation

Once your project has been finished, your installation will be scheduled and performed by skilled technicians.
